# Music by Michael Wild

## Inspired by the Heavens

Michael's music is considered to be some of the finest free flowing, deep relaxation music available. It is described as profoundly beautiful and serene and is perfect for deep meditation, for going to sleep to, or simply for reflective thinking and dreaming.

While there are some differences between the CD's in this booklet, there is a common thread to all productions and that is the free flowing, drifting nature of the music. Listeners often report, right across many of the titles, being transported to other realms, be they realms of relaxation, meditation, sleep & dreaming. In addition, a common area of feedback, is the non imposing aspect of the music, where listeners feel the music floats around, without distracting them from where the mind is placed or from any focused activity. The CD's are also popular for both repetitive and long playing and great for going to sleep or slowing down the mind or the breath. They are widely used for therapies such as massage, reiki etc. where gentle background music is required. Please email any reports, comments, feedback of your own.

### About Michael:

At a young age Michael was fascinated by the Cosmos, ultimately leading to studying Science at University. At the time he also developed a passion for ambient music which would later evolve into his own compositions inspired by the magnificence of the Universe and all contained therein.

For Many years Michael has also participated widely in areas of natural health & spiritual development which has assisted with his creative ventures in his music. He believes his intellectual pursuit to understand the workings of the universe is ultimately satisfied in his

expression through music. Perhaps this is why his music is described so widely as sounds that "transport the listener beyond".

## Ascending the Heavens

2011

Heavenly, angelic music for sleep,  
dreaming and traversing the Heavens

Ascending the Heavens is in part a symphony of heavenly music, particularly represented in the first track on the album. Overall however, choir and strings sounds create a beautiful angelic texture or higher dimensional feel to this music. More orchestral, and less 'spacey' sounds than other recent releases.

Ascending the Heavens also marks 25 years of Michael's music and as a result a limited edition double CD has been made available to celebrate this milestone. One can purchase the latest CD with the first ever album, as a 2 CD package - See over for more details.

## Sacred Geometry 2010

Haunting, meditative music for experiencing the mystery that is Sacred Geometry.

These soundscapes relate to the infinite in universal shapes, patterns & natural designs - the underlying creative forms that give rise to not just to the our physical existence but to all of time & space including other dimensions enfolded through reality. Choir and strings meet with 'beyond earthly' sounds to make an interesting & beautiful texture of music as a backdrop for traversing the fundamental structures beneath our existence.

Sacred Geometry is the basic belief that geometry and mathematical ratios, harmonics and proportion are also found in music, cosmology, space, time & form, and all structures whether large and small.

### Track Titles:

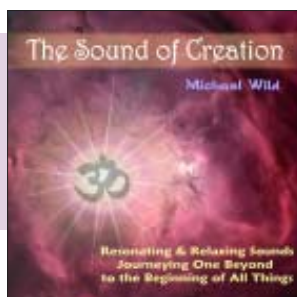

1. Star Tetrahedron (Merkaba) Parts 1 & 2
2. Divine Proportion
3. The Infinite Pi

Used in group meditations & individual healing sessions I always notice people totally letting go of their stresses, flowing into a relaxed space in the self. ## The Sound of Creation 2009

Resonating and relaxing sounds for journeying beyond to the beginning of all things.

Whether or not the universe sprang into being through the enormity of a 'Big Bang' or through the wonder of an 'Intelligent Creation', there did exist a resonance, a vibration or an energy that is beyond all comprehension. The music on this CD is dedicated to our beginnings.

The Sound of Creation has two elements that intertwine to exhibit a different feel to Michael's other CD's. Firstly there is Michael's signature flowing music & relaxing themes. Then, delicately balanced in the background are deep resonating sounds, resembling Sanskrit chanting or deep voice harmonics. As with the vibrations behind the Sanskrit universal sounds, these deep resonations transport us to a sense of our beginnings in time & space. A very special CD.

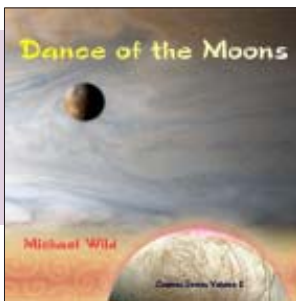

### Track Titles:

1. The Sound of Creation
2. Genesis

**Total Time: 64.32 minutes**

How was the Universe Created? When did Time & Space begin? Has the Universe always existed and will it exist forever? These are questions that have excited the human mind for as long as we have existed ourselves.

*"The beginning of everything has always taken a special place in my desire to understand the workings of the universe. Inevitably this led to a musical expression. To comprehend our true beginning is such a mind boggling adventure, that one turns to what one can truly understand or find satisfyingly & meaningful, and for me that is music".* - Michael

# Dance of the Moons

2008

The Moons  
Cosmos Series Volume 5

" They are over 150 moons in our Solar System orbiting around their host planet in a regular and faithful manner, unwavering and seemingly independent of other happenings. However when viewed as a whole, I cannot help but feel that they are all linked in some way, like a community of different families that dance and weave together. Hence this CD is not made of different tracks representing different moons, but one track that weaves this dance from one moon theme to another". - Michael

### Track Titles:

One track broken into the following sections (planet in brackets refers to the planet the associated moon belongs to)

1. Earth's Moon Rising (Earth)
2. Sea of Tranquillity (Earth)
3. Eruptions of Io (Jupiter)
4. From Ganymede to Europa (Jupiter)
5. In the Atmosphere of Titan (Saturn)
6. Phobos & Deimos (Mars)
7. Ode to Triton (Neptune)
8. Passing Oberon (Uranus)
9. Charon and beyond (Pluto)

**Total Time: 52 minutes (Continuous Play)**

"This CD was a real adventure into bringing more 'spacey' sounds & combinations into my work. It also set a platform for later works as I explored further music making in this manner. I feel it has allowed for more texture and interest in the music and perhaps for the first time not just music that drifts around unnoticed but music that one can listen to more intently. Any feedback on this is welcome". - Michael

# Colours of the Cosmos

2008

The Nebulae  
Cosmos Series Volume 4

Music Inspired by the Heavens!

Nebulae are great expanses of gas & dust that are often the birth place of Stars. The colours & visual effect of nebulae are so striking and beautiful that one could easily believe there is a 'cosmic artist' at work.

Colours Of the Cosmos represent the feeling of floating free through the expanses of these 'nebulous' colours. It is truly a journey into relaxation and dreaming beyond the time and space of our day to day life.

### Track Titles:

1. Pillars of Creation - Inside the Eagle Nebula
2. Falling into the Cosmic Cloud Part 1
3. Into the Blue (Reflection Nebula)
4. The Great Nebula In Orion Parts 1 & 2
5. The Helix Nebula (God's Eye)
6. Falling into the Cosmic Cloud Part 2

**Total Time: 64.46 minutes**

The music on this CD has attracted comments such as 'beautiful' and 'calming'. It is production that has more general appeal and could be an appropriate choice should someone be unsure which one to choose in the range.

"If you would like to know about Nebulae (plural of the singular Nebula) and in particular view some of the fantastic pictures taken by the Hubble Telescope and amateur astronomers I invite you to google some of the names in the track titles. See the Pillars of Creation inside the Eagle Nebula, the star birth in the Orion Nebula and why people call the Helix Nebula, 'God's Eye'. These are just some of the fascinating pictures out there in space - there are many more. I hope you are suitably impressed" - Michael

## Star Islands

2007

The Galaxies  
Cosmos Series Volume 3

### Outerspace Music for Innerspace Calm

Travel 'beyond' with the music of the Galaxies. The Star Islands CD contains what is quite possibly the grandest ambient compositions Michael has ever produced.

Huge & powerful, the galaxies are great star cities. This music reminds us of our own Milky Way galaxy and those way beyond, and in doing so connects us to the far reaches of the Universe.

#### Track Titles:

1. The Milky Way
2. Andromeda
3. Galaxy Deep Field
4. The Whirlpool Galaxy
5. The Perfect Spiral

**Total Time: 55.50 minutes**

*"Thank you so much for your wonderful CD. We played it at our recent class with amazing effect. It sent chills down my spine. ....Magical.....What beautiful music!!!!"*  
Earl Cook, Laser Solutions, USA

Galaxies are certainly magnificent & grand. They are islands of stars in space. And while mere specs of dust within the universe itself, they appear on our scale of things as big as the universe itself. They often contain billions of stars like our own Sun. The galaxy that we reside is actually the Milky Way, the band of stars that traverses right across our night sky. It is so big that to travel across it at the fastest speed we are used to travelling it would still take us millions of years to do so.

The mind boggling thing is that there are billions of galaxies in the Universe, making the total number of stars reach into numbers difficult to comprehend. Many of these stars could have planets revolving around them and perhaps, we hope, something Earth like.

*"I simply love and adore galaxies and it has reflected in this CD, which is probably my personal favourite"* - Michael

*"Purity, serene spaciousness and peace are just some of the words to describe The Planets CD, Michael's best yet"*  
Kizzy Jach, Massage Therapist

*"The Planets CD contains 9 tracks that are quite separate and independent as representation of the planets. However they do fit together wonderfully for general listening and relaxation. For some it is their favourite CD. The Mercury track is one of my own favourites. The Jupiter track is grand. The Pluto track is 'spacey' "* - Michael

Star Dreams is actually a compilation of music produced in 1987 and 1988 that were originally on cassette medium. It has attracted quite a lot of feedback about assisting people in going to sleep and in calming or slowing the breath.

This is also a feedback attributed to other CD's but more so Star Dreams. Often people describe the breath slowing and the mind calming when listening to my music. Also when going to sleep or similar, the left brain seems to have nothing to hook onto and the right brain takes over and sleep or relaxation naturally kicks in.

*"Star Dreams is my favourite CD. It is so beautiful that I cannot find the words to describe it. While relaxing and listening, I begin to float away so much that the world around me just disappears"* anonymous

*"Celestial Sounds was excellent, Star Dreams is OUTSTANDING."*  
Lindsay Jenkins, Music Teacher

*"I love your CD Star Dreams. It takes me into very deep spaces and is excellent for relaxation or the 'Dreamtime'."*  
Tara, Dolphin Connections, QLD

Celestial Sounds is Michael's first ever production. It was released in 1986 as a cassette of about 45 minutes of music. When CD's became a medium for music, an additional track of 20 minutes (track 7 above) was added to complement the length of CD recordings. This production is now approaching 25 years old and is still sold in stores and in some circles is considered a 'classic'. It is one of the first albums to combine Australian Nature Sounds with original relaxing or ambient music.

*"As a lover of nature, camping & bushwalking I also spent time recording the sounds of birds, water and ocean waves. Over a period I recorded many hours of nature sounds, mainly around the forest and beaches of South East Australia. Combining the music and the sounds of nature to produce Celestial Sounds was joining my two great loves in life at the time. Sometimes I feel people still pick up on the joy in the music, especially the first track, Morning Mountains Song". - Michael*

Of all the CD's in the range Celestial Sounds is the one that stands out as the most different. To date it is only one that has nature sounds with the music and therefore it becomes an easier choice to acquire or not.

*"Your CD, Celestial Sounds is terrific. I use it every day as background music for my practice"*

J.Cowan, Naturopath, TAS

*"My copy of Celestial Sounds has worn out through constant playing by myself & my partner I need other copy and I hope it will last another 15 years!"*
